

Shootersim Highlights

SHOOTERSIM simulator family uses some state of the art technology such as easy-to-calibrate laser unit, generic sniper/spotter scope emulators, and also has realistic external ballistics and integrated evaluation software.

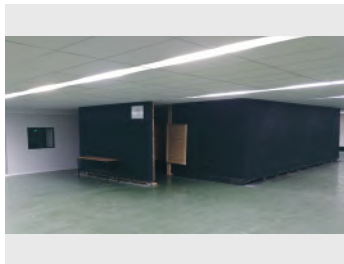

- Real Weapon
- Simulated Weapon
- Simulated Ammo
- Advanced Ballistics Calculation
- Universal Laser Unit
- Simulated Blowback and Sound
- Easy Calibration
- Emulated Optical Devices
- 3D Virtual Environment

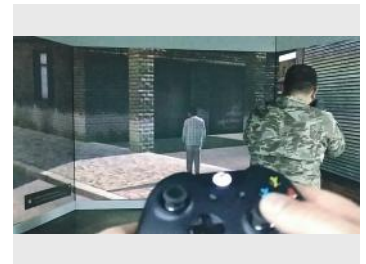

TRAINING ENVIRONMENT

Sniper/Sharp Shooter Simulator
(Virtual Long Distance Shooting Environment)

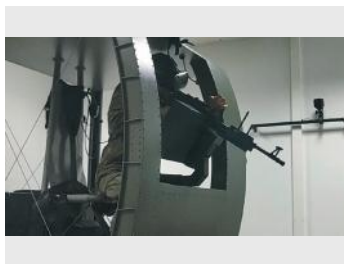

Shoot-House Simulator
(Urban Environment)

CQB Simulator
(Reactive Shooting Environment)

Basic Marksmanship Simulator
(Known Distance Range Environment)

Motion Platform Simulators
(Air, Land, Naval Shooting Simulator Environment on Motion Platforms)

Portable Simulators
(Portable Versions of Basic Marksmanship and Sniper/Sharp Shooter Simulators)

THE FUTURE OF VIRTUAL COMBAT TRAINING

- Artificial Intelligence
- Tactics Simulation
- 9000+ 3D Models
- Battle Simulation
- After Action Review
- Boat Simulation
- Land Vehicle Simulation
- Aircraft Simulation
- 3D Terrain
- Unmanned Vehicle Simulation

About Savronik

Savronik, founded in 1986, has been operating for over a quarter of a century in the Turkish Defence Industry, and is one of the few major players in an industry dominated by quasi-governmental organizations. Starting from early 2000s, we have been employing our defence industry experience also in Intelligent Road Systems, Railway Systems and Integrated Logistics Support.

Savronik produces award winning, high quality products, both unit and integrated solutions, compliant with standards such as ISO 9001:2015, AS9100 rev.D in the fields of electronics, electro-mechanics and software. Our true differentiator however, is our field capabilities which allow Savronik be wherever and whenever our customer needs us. In this respect Savronik is not only a technology company but also a services and maintenance competence center providing full life cycle maintenance and operating services to its customer in the civil and military sector.
